

## Homework 5 (Final term)

- Set up a github page for your project.
- Prepare final presentation in MS ppt or LaTeX beamer format. You will present it on 18 Dec. Include the presentation files in a separate folder (e.g. presentation) of the github project.
- Prepare YouTube presentation (20 minutes) that introduce your project.
- On the github page, write project name, team name and members (if there are members who do not contribute, do not include his/her name.)
- Include the description of the project.
- Show one screenshot of your project in the github front page.
- Include all mock-up screenshots in a separate folder. (mock-ups)
- Include all use-case diagrams and use-case scenarios in a separate folder. (e.g. use-cases)
- Include all requirements documents in a separate folder. (e.g. requirements)
- Include all class diagrams in a separate folder. (e.g. class-diagram)
- Include all sequence diagrams in a separate folder. (e.g. sequence-diagram)
- Include your paper in a separate folder. (e.g. paper)
- Include your program codes in a separate folder. (e.g. src)
- 
- You have to submit the github page URL to eclass before the deadline.
